

## Filled with Theatre Spirit

The organization "Studio 99" makes a documentary film about Lifelong Learning among the actors of the Lagodekhi Public Theatre. Despite of difficult conditions and poor equipment the artists continue performing, learning and developing. The documentary will be an illustration of theatre's daily life: rehearsals, performances, premieres. It will feature the actors, within and outside the theatre and illustrate the power of art which unites people of different ages and social conditions and diversifies their village lives.
